M.Sc. in Biochemistry:

Biochemistry is the basis of Life Sciences and a fascinating subject linking chemistry, biology, physiology and biophysics. Students are integrated at an early stage into the highly competitive and interdisciplinary research groups of the LIMES institute. Opportunities for conducting research projects at national and international partnering universities, first contact with representatives of life science industries, and a mentoring system helps the students to study efficiently, to plan their career in a focused manner, and to become independent.

**Specialise in**
- Cellular Biochemistry
- Chemical Biology
- Biophysics
- Physiology

**HIGHLIGHTS**
- Biochemistry is the basis of Life Sciences and a fascinating subject linking chemistry, biology, physiology and biophysics
- Students are integrated at an early stage into the highly competitive and interdisciplinary research groups of the LIMES institute
- Opportunities for conducting research projects at national and international partnering universities
- First contact with representatives of life science industries
- A mentoring system helps the students to study efficiently, to plan their career in a focused manner, and to become independent

**Degree**
- Master of Science (M. Sc.) in Biochemistry

**Duration of Study**
- 4 semesters (including the Master thesis)

**Start**
- Winter semester

**Study focus**
- Cellular Biochemistry, Chemical Biology, Biophysics and Physiology

**Application deadline**
- June 30th for EU citizens
- April 30th for Non-EU citizens

**Course language**
- English
